DADE. 1699.

THE COUNTRY-MAN's KALENDAR.

For the Year of CHRIST, 1699.
Being the third after the LEAP-YEAR.

Containing the daily Motion of the Sun and Moon, with the Aspects of the Planets, and their Conjunctions with the Moon; And from thence the Inclination of the Air, and Alteration of Weather, throughout the Year.

Accommodated with other Plural Things, As

1 The Sun's Rising and Setting for every Day in the Year.
2 A Chronology of several Remarkable Things.
3 The Commencement of the Four Seasons, and their Nature.
4 The Eclipses of the Sun and Moon.
5 Physical Verses, and Rules for Husbandry and Gardening.
6 Observations and Natural Prognosticks for the Weather.
7 Of the Judgment of Diseases from the Urine.

And to the Benefit of Country-men.

An Account of several Diseases incident to Horses and other Cattel, with their Causes, and the Cures of them.

Calculated for the Meridian of the middle of ENGLAND.

And so the more Useful for that, and the Kingdom of [illegible] also.

Printed by [illegible] for the Company of Stationers. 1699.

BIBLIOTHECA BODLEIANA OXONIENSIS

Example. To find the Intereſt of 70*l.* for 6 Months; Find 70 *l.* in the firſt Column, and right againſt it, in the Column of 6 Months, is 2*l.* 2*s.* and ſo much is the Intereſt. For the Intereſt of the ſame Sum in 9 Months, look for the Intereſt in 3 Months, which is 1*l.* 1*s.* this add to the Intereſt for 6 months, the Sum is 3*l.* 3*s.* the Intereſt of 70*l.* in 9 months. Alſo to find the Intereſt of 75*l.* for 3 months: Firſt, look the Intereſt of 70*l.* for 3 months, which is 1*l.* 1*s.* Likewiſe the Intereſt of 5*l.* for 3 months, is 1*s.* 6*d.* this added to 1*l.* 1*s.* maketh 1*l.* 2*s.* 6*d.* which is the Intereſt of 75*l.* for 3 months.

Full Moon the 5 day, 8 m. after 7 at night.
☽ Last Quarter the 12 day, at 12 at night.
● New Moon the 21 day, 6 m. after 4 in the morning.
First Quarter the 28 day. 30 m. past 2 after noon.

DADE.

A

Prognostication:

In which you may behold the state of this Present YEAR of our *LORD GOD*, 1698.

CONTAINING

The Description of the Four Seasons, the *Eclipses*, the *Passions* of the *Planets*, and the *Inclination* of the *Air*.

Also *Physical Verses*, and *Short Notes* and *Rules* for *Husbandry*, for every Month throughout the Year.

With divers other *Notes* and *Rules* of Good Consequence, not formerly Published in this *PROGNOSTICATION*.

By *WILLIAM DADE*, Gent.

LONDON,
Printed by *T. J.* for the Company of STATIONERS.

Of JANUARY.

IF thou be sick, and help would'st have,
The Counsel of the Learned crave:
If thou hast health, to keep thee so,
Fly Idleness as deadly Foe.

January's *Instructions for Husbandry.*

This Month set all kind of Fruit-Trees, and Quicksets: In the New of the Moon (the wind and weather observed) you may set Pease and Beans, Parsnips and Oats, if the weather prove mild, and the Moon decreasing.

Of FEBRUARY.

Be choice of Food in any wise,
To keep thee warm also precise:
Beware likewise thou let not Blood,
Except the Learned say 'tis good.

Februaries *Instructions for Husbandry.*

This Month set Roses, with all other kind of Plants and Quicksets, sowe Pease and Onions as in the Month before (the weather consider'd) you may now Garden for Sallet-herbs, Pot-herbs, and such like.

Of MARCH.

Now Bleed, and Bath, if thou desire,
And Purge also (if need require)
Ill humors do in many breed,
Provide in time before you need.

March's

March's *Inſtructions.*

This Month (in the New of the *Moon*) Graft, Set Quick-ſets, and Vines, Cut your Hedges and Vines already growing. Alſo you may ſowe Onions, Beans, and Oats, and all manner of Garden-herbs.

Of APRIL.

Now wholſome Baths thou may'ſt frequent,
Let Blood alſo, and not repent;
Theſe are good means thee to defend,
From Griefs, the which on thee attend.

April's *Inſtructions.*

In this Month Pole your Hops, ſowe Barley and Artichokes, Bark Trees for Tanners, ſowe Hemp and Flax, ſet Cytrons, Melons and Cucumbers, and furniſh and repleniſh your Gardens with Summer Herbs.

Of MAY.

Riſe early now this Month of May,
And walk the Fields that be ſo gay;
From Surfeiting ſee thou refrain,
Or ſure it will procure thy pain.

May's *Inſtructions.*

In the beginning of this Month you may ſowe the Seeds of Summer Herbs, which could not endure the cold of the forepaſſed Months: You may yet ſowe Hemp and Flax: Weed your Hop-Gardens, and take away ſuperfluous Branches, and Moſs your Gardens.

Of JUNE.

Drinks New or Sweet, Taſte not at all,
For, thereby grows no danger ſmall

And thy self such pastime take,
As may in God thee merry make.

June's *Instructions.*

In this Month (at the Full of the *Moon*) Gather your herbs to keep dry for the whole year, Weed your Corn Fields and Gardens, Set Rosemary and Gilliflowers, Sow Lettuce, Sheer Sheep, the *Moon* increasing.

Of JULY.

Perfume thy House with Savours sweet,
But such as are for purpose meet;
Abroad as thou in Streets do'st go,
Defend thy self from stinks also.

July's *Instructions.*

In this Month ply your Haying, Fallow your Lands for Whear, Pull up Hemp that is ripe, Get Rue and Wormwood to drive away Fleas and Moths. Dry Flowers in the shade, and then Sun them a little for fear of corruption.

Of AUGUST.

As burning Heat will thee destroy,
So shivering Cold will thee annoy:
Let little sleep thee now content,
Purge not, nor Bleed, lest thou repent.

August's *Instructions.*

Reap Wheat and Rye, cut down your Oats; Gather Garden Seeds, Sow Lettuce and other Winter Herbs in the New of the *Moon.* Use moderate Diet, forbear to sleep presently after Meat, take heed of sudden cold after great heat,

Of

Of SEPTEMBER.

Raw fruits (though ripe) may ſickneſs bring,
Unripe much eat, a dangerous thing;
If now a Surfeit thou do'ſt take,
When others ſleep thou muſt awake.

September's *Inſtructions.*

Set Artichoaks, Sow Seeds for Winter herbs, gather Hops, Apples, and other Fruits (which are fit to be gathered) about the Full of the *Moon*, the weather being dry. Cut Quickſets, Sow Wheat and Rye, kill Bees, make Verjuice, Sow Parſnips and Carrets; Remove and Set Slips of Flowers, Set Roſes, Strawberries and Barbaries, and remove Trees every New *Moon* till *February*.

Of OCTOBER.

Warm Cloths muſt now provided be,
Alſo warm Meats are good for thee:
Have good regard thy feet be dry,
Thou ſhalt avoid much harm thereby.

October's *Inſtructions.*

Remove your Plants and Trees in the New of the *Moon*, and about the full of the *Moon* gather ſuch Fruit as you left ungathered the laſt Month. Set all kind of Nuts and Acorns; and cut your RoſeTrees but once in two years, if you intend to have ſtore of Roſes.

Of NOVEMBER.

If Rheums do not moleſt thy Head,
It is not ill to ſweat in Bed.
Feed on good Meats, if Stomach ſerve,
Elſe ſeek for that which doth preſerve.

Novembers *Instructions.*

In the New of the *Moon* remove young Trees, set Crabtree-Stocks to Graft on, and in the Old of the *Moon*, set Peafe and Beans, sow Parsnips and Carrets, make Malt, kill Hogs, and make Martimas-Beef.

Of DECEMBER.

Now cold December *is come in,*
The poor mans back is cloathed thin;
Then Feed and Cloath him as you may,
The Lord will it three-fold repay.

Decembers *Instructions.*

This Month and the next are best to fell great Timber in the Old of the *Moon*, to uncover the Roots of your Fruit-trees, Fallow Land for Barley, cover Herbs from cold, look well to your Cattel, take Fowl with Nets or Lime-twigs.

Other *Physical Observations.*

Good to
- Let the Sanguine Blood when the *Moon* is in *Pisces.*
- Let the Cholerick Blood when the *Moon* hath her course in *Cancer* or *Pisces.*
- Let the Melancholy Blood, when the *Moon* is in *Libra*, *Aquarius*, or *Pisces.*
- Let the Phlegmatick Blood, when the *Moon* is in *Sagittarius* or *Aquarius.*
- Prepare Humours, the *Moon* in *Gemini*, *Libra* or *Aquarius.*

Good to purge with { Electuaries, Pills, Potions, } The Moon { in *Cancer*, *Pisces*, *Virgo.* }

Good

Good

To take Vomits, the *Moon* being in *Taurus*, *Virgo*, or the latter part of *Sagitarius*.
To purge the Head by Sneezing, the *Moon* being in *Cancer*, *Leo*, or *Virgo*.
To take Clisters, the *Moon* being in *Aries*, *Cancer*, or *Virgo*.
To stop Fluxes and Rheums, the *Moon* being in *Taurus*, *Virgo*, or *Capricorn*.
To Bathe, when the *Moon* is in *Cancer*, *Libra*, *Aquarius*, or *Pisces*.
To cut the Hair off the Head or Beard, when the *Moon* is in *Libra*, *Sagitarius*, *Aquarius*, or *Pisces*.

Other brief *Observations* of *Husbandry*.

SEt, sowe Seeds, and Graft, the *Moon* being in *Taurus*, *Virgo*, or *Capricorn*.
And all kind of Corn in *Cancer*.
Graft in *March* at the *Moons* increase, she being in *Taurus* or *Capricorn*.
Shear Sheep at the *Moons* increase.
Fell hard Timber from the Full to the Change.
Fell Frith, Coppice, and Fuel, at the First Quarter.
Lib or Geld Cattle, the *Moon* in *Aries*, *Sagitarius*, or *Capricorn*.
Kill Fat Swine for Bacon (the better to keep their Fat in boiling) about the Full Moon.

Natural Prognosticks for the Judgment of Weather.

THE foregoing Rules for the Judgment of the Weather, are such as are deduced from the Aspects of the Planets to the Moon, and among themselves; These here following, are such as are deduced from Philosophical Aphorisms. Therefore,

1. The resounding of the Sea upon the Shoar, and the murmur of the Winds in the Woods, when the Wind is not stirring abroad, doth shew Wind to follow.

2. The obscuring of the small Stars, foreshews Tempests.

3. When Stars seem to shoot, Wind comes from that Quarter.

4. If two Rainbows appear, Rain follows: But a Rainbow appearing after Rain, signifies fair Weather.

5. If the Sky be red in the Morning, it is a sure token of Wind or Rain to follow, or both; for the Vapors which cause that Redness will soon be dissolved.

6. If the Sun or Moon look pale, look for Rain; if fair and bright, fair Weather; if red, Wind.

7. If a dark Cloud be at Sun-rising, in which the Sun is soon hid, it will dissolve it, and Rain will soon follow.

8. If a Cloud appear, and afterwards Vapors are seen to ascend up to it, it portends Rain.

9. If

9. If the Sun appear in the East, greater than it usually doth, it is a sign of Rain.

10. If a black Cloud appear in the West about Sun-setting, it will Rain that Night, or the Morning following.

11. If Mists come down from the Hills, or descend from the Sky, and settle in the Vallies, it promiseth fair and hot Weether. Also Mists ascending in the Evening from the Earth or Water, shew a hot day to follow.

12. Water-fowls (as Sea-gulls, Morehens, &c) when they flock and flie together from the Sea towards the Shore. Also when Land Fowls (as Crows, Swallows, &c.) when they flie from the Lands to the Waters, beating the Waters with their Wings, fore-shew Rain and Wind.

13. If the Circles about the Sun be red and broken, it portends Wind; if thick and dark, Wind, Snow, or Rain; and the same of the Circles about the Moon.

14. The Trefoil Grass, against Rain, swells in the Stalk, and standeth more upright.

15. The Wincowpipe (growing in Stubble fields) if you find it open in the Morning, be sure of a fair Day to follow.

16. Aches, Hurts, and Corns, do engrieve against Rain, Snow, or Frost.

17. Worms coming out of the Earth, Moles casting up the Earth, Fleas biting more than ordinary, are evident Signs of Rain to follow.

18. Solid Bodies, as Stone and Wainscot, when they sweat, doth fore-shew Rain.

Natu-

1. WHen there are great number of Frogs, Flies, Locusts, &c. For these Creatures being ingendred of Putrefaction, shew a general disposition of the Year, and constitution of the Air to putrefaction.

2. When Worms are found in Oak-Apples.

3. Great and early heats in the Spring (and chiefly in *May*) without Winds.

4. Great drought in Summer, continuing to the end of *August*, portend a Pestilentious Summer the next year.

5. The Small Pox, Purples, and Agues in the Summer, and hovering all the Winter, portend a great Pestilence the Summer following.

6. A dry *March* and a dry *May* portend a wholesome Summer, if there be a showring *April* between.

Signs of a Sound and Pure Air.

1. A Sound and Pure Air is made hot presently after the Sun-rising, and is made cold immediately after his setting.

2. That which yieldeth a pleasant smell after Rain, clear, and not evaporated, open and lightsome, and when the North-wind bloweth.

3. Where there are Easterly Winds in the Mornings.

Signs of Corrupt and Infectious Air.

1. A Corrupt and Infectious Air is made by the often blowing of the South, or South-East Winds:

Winds: or by the West, or South-West Wind, in the Evening.

2. When the Air is cold long after Sun-set.
3. When the Air is long hot after Sun setting.
4. When the Air is long close, cloudy, or thick.

How to judge of Diseases by the Urine.

1. URine fat and troubled, betokens a burning Fever of choler: Or red and thick all over, with a black Circle, sheweth sickness all over the Body.
2. Urine white and thin, and little in quantity, sheweth cold in the Body.
3. Urine clear, with a black Circle, sheweth the sick Person hath the Ptisick.
4. Urine red and thin, with a bright Circle, shews a bad Stomach.
5. Urine thin, and greenish above, shews a cold Complexion: if blew in casting, 'tis the Ptisick.
6. Urine thin, if it shew black above, betokens great loss of Nature.
7. Urine thick and troubled like Horse-piss, signifies the Head-ach.
8. Urine fat in the bottom, white in the middle, and red above, shews a Quartan Fever.
9. Urine fat like Flesh, with dregs in the bottom like shadowing, shews the Dropsie by cold: But if it be wheyie above, clear in the middle, and shadowing beneath, it shews a hot Dropsie.
10. Urine with black dregs in the bottom, like gobbets of Coles, sheweth Worms.

11. Urine

11. Urine with black Contents (as moaths) in the middle, ſhews an Impoſtume.

12. Urine with Contents like ſhavings of Parchment in the bottom, ſhewing ſtopping of the Reins and Pipes of the Liver.

13. Urine black and green, with long white Contents, ſignifies the Palſie.

14. Urine that hath Grains under the Circle, ſheweth the Stomach is full of Worms, and alſo burning of the Heart.

15. Urine foul above, ſheweth heat in the Heart, Lungs, and Spleen.

16. Urine with black Contents in the bottom, ſhews Coſtiveneſs.

17. Urine that is long laſting, betokens biting in the Body, and great Rheume.

18. Urine thick, little in quantity, and high coloured, ſhews great burning in the Body.

19. Urine Frothy, clear and a little Red, ſhews pain in the right ſide.

20. Urine Frothy, ſheweth wind and pain under the left ſide.

21. Urine very Red, ſheweth an Impoſtume on the Liver.

22. Urine Red as burn'd Gold (if it be Hydropick) betokens Death.

23. Urine in a hot Feaver, one part Red, another part Black, another part Green, and the other Blue, betokens Death.

24. Urine in hot axis, black, and little in quantity, and ſtinking, betokens Death.

25. Urine all coloured as Lead, ſheweth a prolonging of Death.

26. Urine

26. Urine dark, and clear beneath, betoketh Death.
27. Urine that ſhineth raw and white (if the skum in the bottom ſhines not) ſhews death.
28. Urine thin in ſubſtance, fleeting above like a dark Skie, betokens Death.
29. Urine dirty, ſtinking, and a dark Skie, betokens Death.
30. Urine like Water, with a dark Skie, in a Fever, ſheweth Death.
31. Urine with dregs in the bottom, mingled like Blood, ſheweth Death.
32. Urine black and thin (if the ſick do loath when he goes to the Stool, and ſpeaks overthwart, or underſtands not aright) if his ſickneſs goeth not from him, it ſignifieth Death.

A Deſcription of the Magnitudes, Motions, and Diſtances of the Seven Planets.

Argol, a laborious and learned *Aſtronomer*, giveth this account of the Planets Motions and Diſtances, to wit:

The Sun is greater than
- *Saturn*, Nine times.
- *Jupiter*, Fourteen times.
- *Mars*, Two thouſand five hundred thirty five times.
- *Venus*, Twelve hundred and ſeventy times.
- *Mercury*, Three thouſand ſeven hundred and five times.
- The *Moon*, Ten thouſand times.
- The *Earth*, One hundred ninety ſix times.

Saturn

Saturn is greater than
- *Jupiter*, The one half.
- *Mars*, Two times.
- *Venus*, Two hundred eighty fi times.
- *Mercury*, Four hundred an eighteen times.
- The *Moon*, One thousand on hundred twenty two times.
- The *Earth*, Twelve times.

Jupiter is greater than
- *Mars*, One hundred eighty two times.
- *Venus*, Eighty four times.
- *Mercury*, Two hundred fixty fi times.
- The *Moon*, Seven hundred and Fourteen times.
- The *Earth*, Fourteen times.

Venus is twice as big as *Mars*, and three times as big as *Mercury*.

Mars contains *Mercury* once and an half.

The *Moon* is greater than
- *Mars*, Thirteen times.
- *Venus*, Six times.
- *Mercury*, Nineteen times.

The *Earth*	is distant from the *Firmament*	49150720
Saturn		127864480
Jupiter		35425120
Mars		47490640
The *Sun*		44720000
The *Moon*		48958080

Saturn is distant from
- *Jupiter* —— 23138640
- *Mars* —— 29316440
- The *Sun* —— 3193352
- The *Moon* — 36171600

Miles.

Jupiter,

Jupiter is distant from { *Mars*——7722800 / The *Sun*——9294880 / The *Moon*—13532960 } Miles.

Mars is distant from { The *Sun*——1572080 / The *Moon*—6310160 } Miles.

The *Sun* is distant from the *Moon* 4238080, that is, Four Millions, Two hundred thirty eight thousand, and eighty Miles.

Hæ incredibilia videntur tantum iis, qui Mathematicis demonstrationibus non assueverunt, &c.

Of the Properties, and Natural Effects of the Seven Planets.

Saturn.

Saturn being well posited, is like a grave *Counsellor*, & a Man of authority thinking of great matters, a lover of Secrets, Diligent, Solitary, Covetous, Studious and a Zelotype—Being evil affected, he is an Abject, a Pick-thank, fearful, given to Solitariness, Sad, Stubborn, Ill-willy, Deceitful, Sloathful, Dull, a Lyar—By nature he hath relation to a Husbandmen, Masons, Blacksmiths, Diggers in the Earth, Tanners, & the like.

Jupiter.

Jupiter is said so be the greater Fortune, & of Nature is benevolent; Being well situate, he maketh men honest, prone to good duties, pious, magnanimous, vericundious, modest, wise, diligent, liberal & yet careful of their own—Being evil disposed, he is more prodigal & stout—He signifies, Bishops, Church-Governors, Lawyers, Judges, Governours of Towns and Cities, and Ecclesiastical Persons.

Mars.

Mars.

Mars being well affected, is valiant, generous, hasty, given to War, fearing no danger, impatient of servitude, and injuries, not respecting riches—But being badly seated, he is ireful, cruel, prodigal, a Tyrant, a Murtherer, and the author of discords and seditions—He hath relation to Soldiers, Surgeons, Turks, Fire-works, &c.

Sol.

He is Magnanimous, Valiant, Provident, a giver of long life, and a healthful body—He maketh Men wise, famous, desirous of honours, having signification of Kings, Princes, Dukes, Marquesses, Earls and Potentates.

Venus.

Venus being well situate, maketh men fair spoken, pleasant, fair, delicate in gesture, given to pleasures, sociable, merciful, &c—But being ill affected, she is effeminate, timerous, a lover of Maids, sluggish, lustful, a Zelotype, and given to idlenss.

Mercury.

Mercury being well seated, causeth a sharp wit, maketh men studious, and capable of learning—Being ill seated, he is subtile, crafty, malicious, ad a Lyar—Of Persons, he signifieth Philosophers, Poets, Mathematicians, Scriveners, Merchants, and the like.

Luna.

The *Moon* maketh Men unconstant, fearful, prodigal, studious of Histories, and given to Navigation and Planting—She signifies Embassadors, Legates, Queens, Ladies, also Common People, Fishers, Watermen, and such like.

Of

Of the Four Quarters of the YEAR 1699.

Of WINTER.

Winter Quarter (after the *Astronomers* Account) began the 11th of *December*, at which time the Sun entered into *Capricorn* the last year, and continues till the Tenth of *March* this year. So that always the first part of the Astronomical Winter Quarter, is in one Politick year, and the latter end thereof is in the other.) At which time was the shortest day of the year, by reason of the Suns greatest declination from the Equinoctial Line.

This Season of its own disposition, is known to be cold and moist, contrary to the quality of the Summer; and, in this Quarter the inward parts of Man are very hot, and being healthful, may receive plenty of Food, because natural heat is now comforted, and is gone inward, and there increaseth, and maketh Digestion the better.

The Sicknesses whereunto this Quarter is most inclined, are *Rheums*, *Gouts*, *Pushes*, *Sore Eyes*, *Melancholy*, *Coughs*, *Catharrs*, *Sciatica's*, *Falling-Sickness*, Diseases proceeding of *Rot-*

tenness and *Corrupt Humors*; with divers kind of Fluxes incident among Women.

Of the SPRING.

THe Spring-time (being the most pleasant and Wholsom Season of the Four) taketh its beginning on the Tenth of *March*, when the Sun entreth into the Equinoctial point *Aries*, making the days and nights of equal length; which Quarter endeth the Tenth of *June*, when the Sun entreth into *Cancer*.

This season is naturally hot and moist, and of the Sanguine complexion, being the most temperate and healthful time of the year; and is therefore accounted the fittest time to cure diseased Bodies in, and to restore health again in those in whom formerly it hath been decayed by any kind of evacuation.

The Infirmities of this Quarter are *Melancholy*, *Madness*, the *Falling Sickness*, *Bleedings at the Nose*, *Hoarseness*, *Coughs*, *Itch*, *Scabs*, many *Ulcers*, and small *Apostumes*, the *Gout*, all *Pain in the Joynts*, *Pleurisies*, *Dropsies*, *Pestilent Agues*, *Shortness of Breath*, *Faintings*, *Pains in the Head*, *Eyes*, and *Stomach*, *Rotten Feavers*, and other *Strange Diseases*.

Of SUMMER.

SUmmer (accounted the Third part of the Year *Astronomical*) taketh its beginning at the time of the Suns entrance into the first min. of the Solstitial Sign *Cancer*, which is the

Tenth

Tenth of *June*, at which time he makes his greatest declination from the Equinoctial towards the North, and causeth the longest day and shortest night in the year; and so Summer holdeth on till the 12th of *September* following.

In this Quarter the Stomach cannot digest such hard Meats as it will in the Winter season, for that natural heat is now distributed into the exterior parts, and man is not now so hot within as in Winter.

The Sicknesses at this time are divers, as *Burning Agues*, *Pleurisies*, *Frensies*, *Hot Apostumes*, *Divers pains in the Head*, *Sundry Inflamations*, and *New Infirmities*, proceeding especially of *Hot Cholerick Humors*, wherewith many will be sore molested.

Of AUTUMN or HARVEST.

Autumn or *Harvest* (being the Fourth, or last Quarter of the Year) begins upon the 12th of *September*, the Sun then making his entrance into the second Equinoctial Sign *Libra*, working the same effect that he did at his entring into *Aries*, that is, making the days and nights of equal length, rising at six in the morning, and setting at six at night; and this Quarter doth last until the Eleventh of *December* following.

The quality of this Season is naturally cold & dry, yet by reason of its mutability, 'tis the most unwholesome; by means whereof, it is more subject to sickness than any other: for the dregs of all diseases, of the former parts of the year, will now break forth and be seen.

The Diseases of this Quarter are like to be many and dangerous, as *Black Jaundices, Megrims, the Falling Sickness, Oppilations in the Spleen, Difficulty of Breathing, Convulsion Fits, Dropsies, Sciatica's, Biles, Tooth-ach*, and many more: *From which good Lord deliver us.*

Of the ECLIPSES *this* YEAR 1699.

FOur times this year will the Luminaries be Eclipsed; the Sun twice, and the Moon as often.

The First Eclipse will be of the Moon, upon the 5th. of *March*, at 8 min. after 8 of the Clock at night; at which time one half of the Moons body will be obscured.

The Second Eclipse will be of the Sun, upon the 21th. of *March*, at 8 in the morning, it will be a very small Eclipse, and not easily perceptable.

The Third will be of the Moon, upon the 30th. day of *August*, near Eleven in the forenoon, at which time the Moon will be under our Horizon, and therefore cannot be seen of us.

The Fourth Eclipse will be of the Sun, on the 13th. of *September*, at 41 min. after 9 in the morning, at which time Ten parts of Twelve of the Suns body will be Darkned.

Of several Maladies, Diseases, and other Distempers incident to Horses and other Cattle, with their Causes and Cures.

I. For Rottenness in a Beast.

If your Beast be subject to Rottenness, you may know it by his Poverty and Leanness, and continually Scowring: And if they be very Rotten, they will Scower Whitish Brown, and it will stink very filthily.

The Cure.

Give the Beast Bay-berries beaten to Powder, Myrrh, Elder-leaves, Rue, Featherfew, all made small, and take a lump of the bleweſt Clay you can get, and burn it till it be very red, or almost black, and then pound it to Powder, and blend all together in strong Urine, and give the Beast half a Pint at a time Milk-warm, three several times, it will stop the Scowring and heal the Beast.

II. A Remedy for the Blain in the Tongue.

It is a certain Bladder growing above the Root of the Tongue against the Pipe, which grief at length with Swelling, will choak and stop the Wind: You may perceive this Distemper by Gaping and holding forth of his Tongue and foming at the mouth, without a speedy Remedy it will kill him—The Cure is to cast him and to take forth his Tongue and slit the Bladder, or break it thereon; then wash it with a little Vinegar and Salt and he will recover.

III. To help a Beast that is Goared.

Take Ashes finely sifted, and mix them with the Grounds of Ale or Beer, making it as thick as Butter, lay it thereon and it will heal it.

IV. A Remedy for the Fantasie in a Beast.

This Disease will shake him much, and make him quiver in the Flanks, and to pant extreamly: For the Cure, you shall give him some Runnet, Soot and Chamber-Lie mixed together.

V. To

V. *To kill Lice and Ticks in Cattle.*

Take the Decoction of Wilde Olives mixed with Soot, with this Rub and Chafe the Beast all over — Cedervise, take the Herb Bears-foot, stamp it, and then strain it with Vinegar mixed with it, and so apply it.

VI. *Of sore Eyes in Ox, Cow, or Calf.*

There is a Distemper in the Eyes called the Inflammation, which cometh by Blood, and breedeth Blindness, sometimes the Beast sees a little, and sometimes not at all. To cure this Cord them in the Neck, and bleed them very well in the Temples under the Eyes, then put in some live Honey and burnt Allom, mixed together, every day, and the Eyes will certainly mend.

VII. *Another Cure for sore Eyes.*

Burn Mutton Bones very well, pound them to Powder, and searse them; then take burnt Allom, tutter, white Sugar-candy, mix all with the juice of Ivie, and it will help them that have a Fleam that cometh by a blow. Also the marrow of a Goose-wing is good to cure the same.

VIII. *Another Cure for sore Eyes in Cattle.*

Burn Egg-shells between two Tileshads, and when they are burnt pound them, and searse them, and with a Quill blow this Powder into the Beasts Eye two or three times a day, and they will mend presently. Also the former Powder and white Sugar-candy mixed with Butter without Salt, into a Salve; the Eyes anointed with this three times a day, will certainly heal them.

IX. *Of an Arberry, or Wart in any Beast, the Cause and Cure.*

This Disease is most incident to young Beasts under 5 years old: It cometh of blood, and is a spungy kind of flesh, full of blood and water. The cure is several ways (1) If it be a great one, take 8 or 10 Horse-hairs, and tie them as hard about it as you can, and in 8 or 10 days time you will see it fall away; then heal it up with unslackt Lime and Honey. (2) If it be a flat one, sear it off with an hot Iron, and heal it up as before. (3) If it be amongst sinews and veins,

you

you must set it away with Mercury or Roslager, then stop the hole with flax and whites of eggs for two days, then heal it up with Powder of unslackt Lime and Honey.

X. *Of Madness in the Head in Cattle, as of Bull, Ox or Cow. And how to cure it.*

For madness in the Head, it proceedeth principally from the Blood, and this Disease may easily be discovered: For Beasts thus troubled will reel as they go, will set their head into their neck, or against a Wall, Tree, or Gate so fixed, that a Man or two can hardly move them. For the cure of this Distemper, the following Receipt is excellent. You must first Cord them in the Neck, and blood them very well in the Temples under the eyes, and in the ears; then give them in a Quart of strong Ale Fenigrick, Turmerick, Long-Pepper, and Green Aniseeds, of each a like quantity, with some juice of Rhue: Give it them milk-warm, the thinnest half in at the nostrils, the other at the mouth, and it will undoubtedly cure them, if taken in any time.

XI. *Of the Tillowness in the Bodies of the Beasts, the Cause and Cure.*

Of all Diseases in Cattel, this is the Original or Fore-runner, and it is easily discovered: For Cattel being infected therewith, will be yellow in ears, eyes, end of the tail, and sometimes all over the body. To cure this Distemper, you must bleed them well, both in the ears and tail, rubbing them, that they may bleed the more freely: Then put some Salt into their ears, and give them two handfuls of Salt dry overnight down their throat: In the morning give them Fenegrick, Turmerick, Long-pepper, Aniseeds, and Liquorice, made into Powder, and all put into strong Ale milk-warm. This is a certain Cure.

XII. *Of the Blend water, the Cause and Cure.*

Some call this Disease, The Morehow: It is occasioned several ways, (1) by Blood. (2) from the Yellowness. (3) from change of ground; for hard ground breedeth this. It may be thus cured: Take one penniworth of Bolearmoniack, and as much fine flower of Charcole as will fill an Egg-shell, and a good quantity of the inner Bark of an Oak dried and pounded;

pounded, put these into a quart of new Milk, and a Pint
Evening. Give this the Beast two times, and it will cure

XIII. *There is another Cure for this Distemper which never fails.*

Take a quart of new-churn'd Milk: Also take a
piece of Lean Salt hung-beef broiled upon the Coals,
become a Coal it self, and when cold make it into
Take also a penniworth of Bolearmonick pounded,
handful of Shepherds Purse; put all these together
Milk, and give it the beast. This Receipt never fails.

XIV. *Of the Worm in the Tail, the cause and cure.*

This Disease is discovered by the Tail it self, for
times the hair will go off where the warm is, but
commonly the Joynts are eaten asunder therewith,
they will knock one against the other, and this is the
tain token: It may be thus cured. Slit the Skin of the
der side above the decayed Joynt, and just against the Ve
Then prick the Vein, and let it bleed very well: Then
Garlick, Butter and Salt mixed together, and apply it to
wound, binding it up, and it will soon mend.
